AIRTIGHT WELDED CONTAINERS

Custom Made, Lightweight, Airtight, Reusable, Containers.

B&P Manufacturing is a reliable manufacturer of quality reusable metal shipping and storage containers of varying size and purpose.

Containers can be built-to-print, produced to customer furnished requirements/specifications, or custom designed and engineered by B&P.

From concept, to prototype, to full production manufacturing, B&P has you covered.

Features and options:
- Light weight
- Shock mitigation
- Humidity indicators
- Locking seals
- Anti-static foam
- Desiccant ports
B&P is a best value, quality, custom container manufacturing source.

Since 2012, B&P Manufacturing has produced over 1,000 airtight welded containers of various size and function, all on time and on budget, for the US Navy.

B&P has a history of quoting and delivering on pre-existing container programs at considerably lower prices than incumbent contractors. Competitive pricing and in-house capabilities allow B&P to be a best valued source for quality complex metal containers.

Increase competition in your procurements, contact B&P for a quote today and realize the potential budget savings you could accomplish.
